Varicose veins are more than a cosmetic issue!

Varicose veins are a form of vein (venous) disease and can progress to a more serious condition if left untreated.

VascularSpecialists of Central Florida, Inc.

Please take this self-assessment to see if you might be a candidate for additional screening for potential varicose veins and/or chronic venous insufficiency.

SIGNS AND SYMPTOMS
Do you experience any of the following signs and symptoms in your legs or ankles? □ Yes □ No
